

Collections 2025

Welcome to the 2025 Apple Bee Purchase Catalogue

This catalogue has been created with your needs in mind. Inside, you'll discover all essential information about our distinguished outdoor furniture collections, presented in a clear format.

Supporting Your Success

As an Apple Bee dealer, we're committed to simplifying your sales process. This catalogue includes not only dimensions and weights but also valuable insights into fabrics, materials, and maintenance. With this information, you'll be well-equipped to provide expert advice to your customers.

Tailored Solutions Just for You

If you're interested in custom-made designs, we're here to help bring your ideas to life. Visit our spacious 400 m² showroom in Dongen (NL), where we can discuss bespoke options and explore how Apple Bee can support your unique needs.

Let's connect!

We look forward to working with you in the coming season and wish you a successful and thriving 2025 season. Let's create something extraordinary together!

OUR DESIGN

Apple Bee's collections clearly show designers with passion for their craft. Designers who stand in the tradition of Dutch Design in which the keywords minimalist, experimental, innovative, unconventional and with a sense of humour are clearly recognisable. No baroque excess, but rather to-the-point and pure. The design focuses on the purpose, the function. The interplay of lines and the materials used make the furniture unique. That is why Apple Bee garden furniture remains a delight even after years, because pure design quality is timeless.

DESIGNERS

Sako Wijma loves pure lines. Form follows function, so functionality remains leading. The design serves that purpose. Which is not to say that there should be no fun in the design; on the contrary! But always embedded in the overall picture of tranquillity and balance, in which the power of the lines is preserved. Sako pursues this peace and balance not only in lines, but also in a mix of materials. People often experience a sense of luxury and comfort from this. Although you can characterise his work as minimalist, his design is never strict and rigid, but rather friendly and inviting. After all, in this too, form follows function. People are central; the design is there for them.

A stylized signature of Sako Wijma.

Ralf de Bruin designs products that are aesthetically refined and durable. He likes to work with luxurious and natural materials that you can enjoy for a long time. To experience peace, space is necessary. You can see this in Ralf's designs. He is careful - almost reserved - in the choice of elements he uses. He consciously uses the empty space between the different elements to create a pleasant visual tranquility. Symmetry and a combination of organic and geometric elements play an important role in his design. This creates a contrast that continues to fascinate, making the design still interesting to look at even after years.

A stylized signature of Ralf de Bruin.

POWDERCOATED ALUMINIUM

Aluminium is an exceptionally lightweight and rust-resistant material, making it ideal for garden furniture. It is frequently combined with other materials, such as wicker, teak, and rope, to further enhance its properties. We use aluminium as the foundation for all our furniture frames because it is lighter than steel and resistant to rust. For our wicker furniture, the aluminium frame is wrapped with our exclusive Biculair® weaving material. Since we manufacture these aluminium tubes in-house, we have complete flexibility in creating the desired shapes and profiles. Whether woven or not, all our frames are finished with a durable powder coating. This UV-resistant coating provides additional protection, ensuring the aluminium withstands all weather conditions.

BICULAIR® WICKERWORK

A distinctive Apple Bee feature is the use of special Biculair® wickerwork, originally developed for professional applications. This highly durable synthetic rattan fibre (HDPE) is fully weather-resistant, colourfast, recyclable, and therefore an environmentally friendly choice. As a result, the furniture's appearance and performance remain unaffected by European weather conditions, with colours retaining their natural vibrancy. The superior quality of this wickerwork, verified by the Netherlands Organisation for Applied Scientific Research (TNO), is evident when compared to other similar materials. The aluminium frame beneath the wickerwork, providing a sturdy and durable foundation for the furniture.

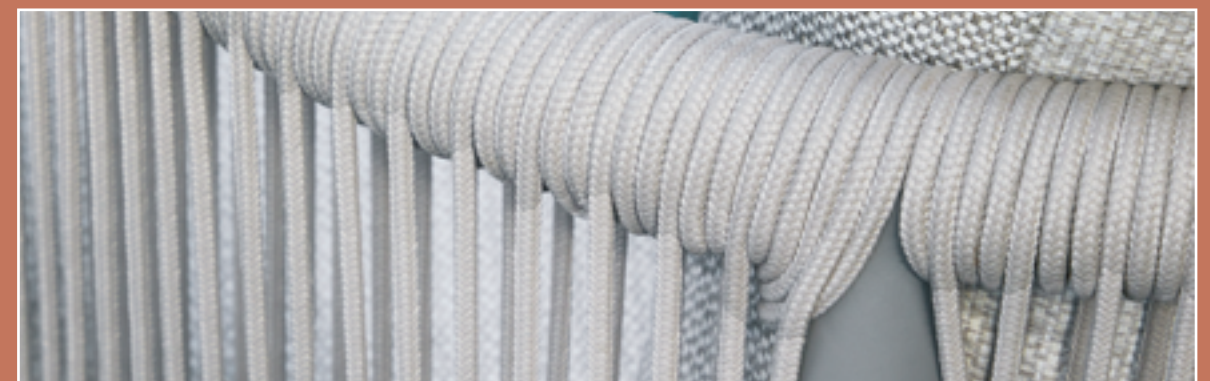

ROPE & BELT WEAVING

At Apple Bee, we incorporate 'rope' as one of our weaving materials. This rope is machine-made in different dimensions. Featuring durable, water-resistant, soft fibers that are woven around a strong woven core of polyester fibers, coated with a top layer of PVC. These ropes are intricately woven around the furniture frame. This provides the perfect balance of robust quality with minimal stretch, while maintaining a soft, comfortable texture. We also innovate by combining rope with belt materials, creating a distinctive weaving structure unique to Apple Bee. The interplay between the round "vertical rope" and the flat "horizontal belt" results in an eye-catching pattern of lines. The craftsmanship in the way the round "rope" is woven around the frame showcases exceptional skill. Rope is an excellent material for outdoor furniture due to its strength, ease of maintenance, durability, and quick-drying properties. At Apple Bee, our rope is UV-resistant, ensuring it resists sun-induced discoloration. Similarly, the belts used in our furniture are made from soft, durable, and water- and UV-resistant Olefin fibres—the same material used in our Sunproof cushion fabrics. This ensures our furniture remains comfortable even without cushions. Thanks to the versatility of widths and designs, our designers continuously create distinctive styles for each piece.

Maintenance

Cleaning rope and belt furniture is straightforward. Start by removing loose dirt and dust using a soft brush or a vacuum cleaner with a brush attachment. Prepare a mild detergent by mixing gentle soap with warm water. Use a soft brush or sponge dipped in this solution to gently clean the rope surface. Avoid using harsh detergents or vigorous scrubbing, as this can damage the fibres. Rinse thoroughly with clean water, using a garden hose or a bucket. Allow the furniture to air dry or use a clean cloth to dry it. Ensure the furniture is completely dry before storing or using it. To maintain its appearance, repeat this cleaning process regularly based on the frequency of use and exposure to the elements. This will help prevent dirt build-up and keep your furniture looking its best.

BEE WETT® CUSHIONS

Premium technology

Apple Bee furniture is crafted using the highest quality materials, and the same standard applies to our cushions. The Bee Wett® range features weather-resistant cushions that can be left outside even during heavy rain showers. The removable covers are made from premium fabric, which are water repellent and UV-resistant. Unlike traditional foam, Bee Wett® cushions are filled with high-performance outdoor foam designed specifically for outdoor cushions. This foam is produced by a sophisticated process called Hydro-Blast Reticulation. This process gives Bee Wett® foam its unique porous open-cell structure, making it outperform closed-cell, non-reticulated regular foams completely. The large, open pores in the foam allow water to drain rapidly and fresh air to circulate freely and continuously. Bee Wett® cushions therefore, dry quickly, feel luxurious, but they are also stronger and more supportive. That's why our cushions maintain their shape.

Bee Wett® cushions are upholstered with Olefin covers, which are resistant to rot, fungus, and damp. The premium fabric used for the covers are also UV-proof, soft, and highly comfortable. Thanks to advanced drainage technology, Bee Wett® cushions quickly releases moisture that enters through zippers or seams.

Bee Wett® cushions are a choice of exceptional convenience and durability.

Scan to watch!

Preserve the beauty of your Bee Wett® cushions

Brush off dirt:

Regularly brush off dirt and debris to prevent it from becoming embedded in the fabric fibers.

Immediate cleanup:

Promptly clean up spills to avoid staining.

Avoid harsh chemicals:

Refrain from using harsh cleaning agents or chlorine, as these can damage the fabric.

Gentle cleaning:

Soak the cushion covers in a mild soap and water solution or machine wash them on a delicate cycle at a maximum of 30 degrees Celsius.

Thorough rinsing:

Always rinse the covers thoroughly to remove any soap residue.

Water-repellent treatment:

To maintain the water-repellent properties of the fabric, add a small amount of a fabric protector to the final rinse.

Prompt reassembly:

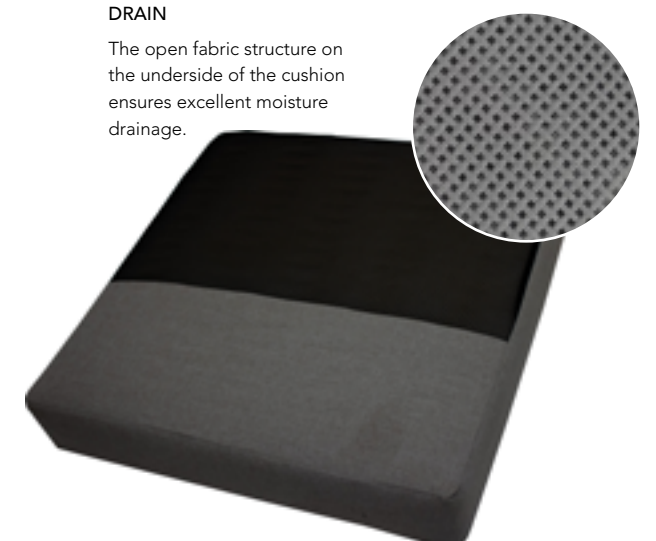

Once the covers are washed, immediately replace them on the cushion fillings to ensure a tight, wrinkle free fit after drying.

Air dry:

Air dry the cushion covers naturally. Avoid using a dryer or iron, as these can damage the fabric.

DRAIN

The open fabric structure on the underside of the cushion ensures excellent moisture drainage.

CERTIFIED TEAK

At Apple Bee, we pride ourselves on craftsmanship and have worked with premium materials like teakwood for many years. We use only certified teak, sourced from sustainably managed plantations. Naturally honey-brown in colour, teak is ideal for outdoor use due to its high oil content, which provides exceptional durability. When exposed to the elements, teak develops a beautiful silver-grey patina, a feature many people find appealing. For those who prefer to preserve its original colour, Apple Bee offers a range of finishes and care products. These include a teak cleaner, a teak shield, and our specially developed solutions to restore the unique Apple Bee finishes. For detailed instructions on cleaning and maintaining your teak furniture, visit our website and access our comprehensive teak care guide by scanning the QR code.

TEAK CARE

Sustainable and Earth-Friendly Wood

Apple Bee's wood is environmentally friendly. Teak is one of nature's finest and most valuable materials, and we source our teak from plantation forests, helping to preserve natural forests.

Teak's natural oil content provides a protective layer, making it highly durable. Additionally, all our teak furniture is pre-treated during production with an anti-fungal solution, effectively eliminating mould and mildew spores within the wood.

For outdoor use, teak furniture is exposed to rain, sunlight, dirt, moisture, and fungi, so proper care is essential to maintain its quality and longevity. Apple Bee therefore has developed a few special maintenance products for their teak products. Which are gentle for the wood and do not leave soap residues that can become moldy.

Apple Bee - Teak cleaner

Apple Bee Teak Cleaner is specifically designed to kill mould and mildew spores inside teak. It contains both cleaning and brightening ingredients.

Article No: OV0010 | EAN: 8718091508382

Apple Bee - Teak natural color protector

Apple Bee's easy-to-apply teak protector is designed to maintain the natural honey-brown color of your new teak furniture for an extended period. Traditional teak oil often leads to black spots on the wood, Apple Bee Teak protector Natural prevents such blemishes, ensuring your teak stays pristine. Unlike oil-based products, our protector is non-greasy, keeping your clothes clean while offering superior protection. Completely water-based and solvent-free, our protector is an EcoSafe choice for preserving the beauty of your natural teak furniture.

Article No: OV0014 | EAN: 8718091522388

Apple Bee - Teak color restore Coastal

Apple Bee Teak Color Restore Coastal is specially designed for maintaining the unique Coastal finish on Apple Bee teak furniture. Over time, the Coastal color may fade, but this treatment protects the teak and helps it retain its natural, cool grey appearance. Apple Bee Color Restore Coastal typically lasts throughout the entire season without causing the wood to turn black or grey. Its durability depends on factors such as frequency of use, sunlight exposure, humidity, rainfall, the age of the teak and other environmental conditions.

Article No: OV0013 | EAN: 8718091516578

Apple Bee - Teak shield

Apple Bee Teak Shield is designed to slow the growth of algae and fungi, helping to preserve teak's silver-grey patina for an extended period without developing green deposits. We recommend treating your teak furniture with Apple Bee Teak Shield at least once a year. For tabletops, which experience more frequent use, additional treatments may be necessary. In conditions of prolonged dampness, extreme green deposits may occasionally occur. In such cases, applying Apple Bee Teak Shield twice a year is advised to maintain the furniture's appearance and protection.

WOODLAND WHISPERS

MIX & MATCH

T A B L E S & C H A I R S

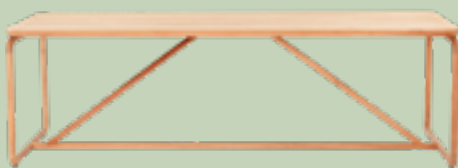

'Woodland Whispers' evokes the serene and mystical feeling of a silent forest. It suggests the soft sounds and subtle movements that can be experienced in the forest, such as the rustling of leaves, the gentle chirping of birds and the whispering breeze. This theme captures the essence of the calm and peaceful ambience of a woodland setting.

NATURAL BLUSH

MIX & MATCH

T A B L E S & C H A I R S

‘Natural Blush’ refers to a soft, subtle pink shade reminiscent of the natural colour of blushing cheeks. It evokes a feeling of freshness and softness, and can give space a warm inviting atmosphere. This colour goes well with natural wood tones such as teak and oak.

APPLE BEE IN-STORE PROGRAMME

We believe in partnership. That's why we introduce you to our Instore Apple Bee Promotion programme, which provides you the tools that lead to extra margin on our Apple Bee collections. Together with your Apple Bee account manager, you decide which tools to choose and how many different Apple Bee collections to place in-store, and your purchase price will be determined accordingly.

To give you an idea: It is already profitable starting with a minimum of 5 showroom sets (4 + 1 newly introduced 2025-collection), and additionally add unique in-store tools to further optimize. This allows you to determine your margin. Personalise your shop environment with the Apple Bee instore tools: dividers, banners and rugs. They show customers where our premium brand is located in your store and clearly explain the Apple Bee USP's. Beautiful and informative visual elements that support your sales staff!

Make an appointment with your Apple Bee account manager to help you put together the best mix for your promotional package.

MAXIMISE YOUR MARGIN

IN-STORE PROMOTION TOOLS :

DIVIDER

The full teak dividers are a real eye-catcher in every showroom. Add extra (artificial) plants for a stylish, transparent and functional partition between the different sets. The dividers feature a panel to inform the consumer. On one side of the panel, the Apple Bee logo immediately makes it clear where the Apple Bee collections are located and on the other side of the panel, the various USPs of the Apple Bee furniture are made visually clear.

ROLLER BANNER

The roller banner gives the sales staff additional guidance regarding the USPs of Apple Bee furniture. The main USPs are depicted with icons and QR codes that lead potential buyers directly to our website and socials for even more information. An indispensable sales support for any Apple Bee dealer!

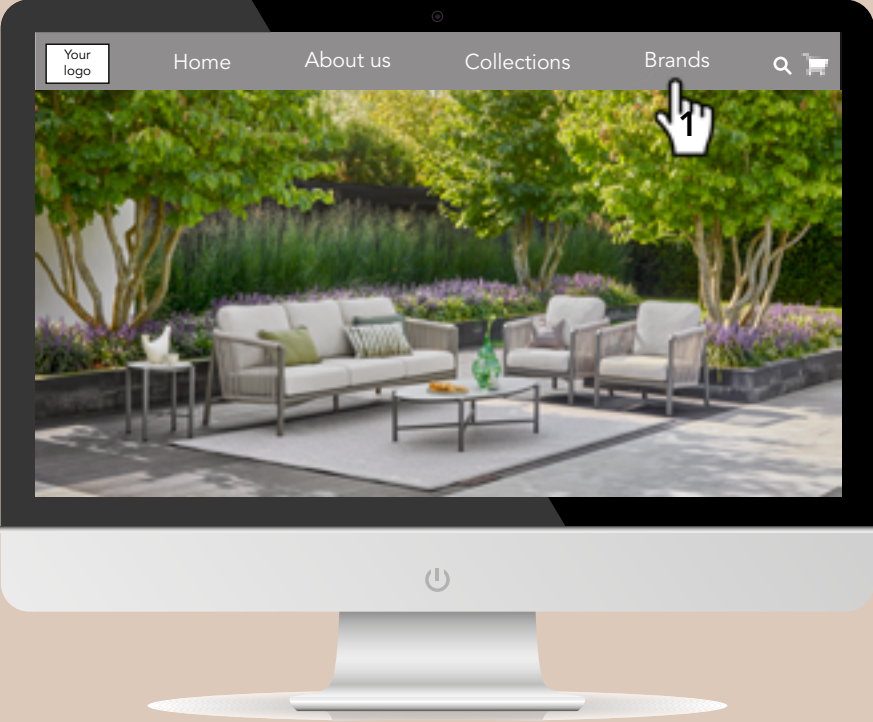

RUG

Enhance the showroom displays with a stunning Apple Bee outdoor rug. These rugs add warmth and charm, giving each set its own distinct in-store presence. Don't hesitate to ask us for more information!

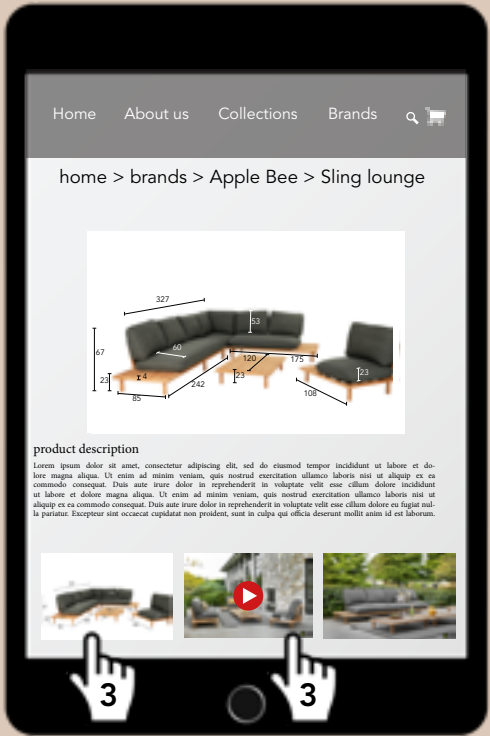

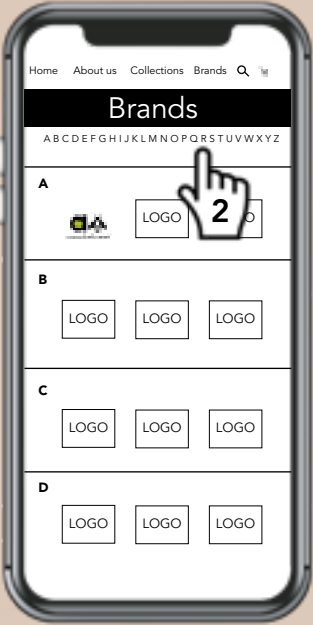

ONLINE PROMOTION PROGRAMME

Also for online shopping, our Apple Bee online promotion programme gives you tools to maximise your margin with Apple Bee collections. This programme is structured in different parts, just like our in-store promotion programme. The following pages explain step by step exactly how it works. Would you also like to maximise your margin with Apple Bee collections, please contact your Apple Bee account manager to discuss the possibilities. We will be more than happy to assist you!

1. Your mainpage shows a brand section

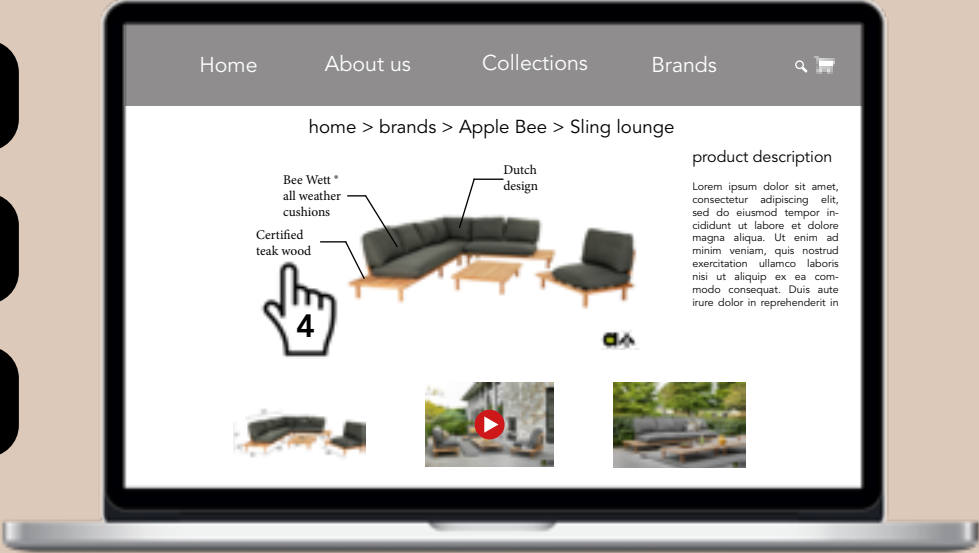

2. By selecting 'brands' the brands are shown in alphabetical order

3. After selecting the product page the product sizes are shown in the first slide, preferably indicated with lines.

The second slide shows a product video.

4. On the product details page, the Apple Bee USPs must be highlighted, such as:

WARRANTY

Our garden furniture is covered by a 3 year warranty, which extends to material and manufacturing defects, under normal usage. The warranty excludes:

- Damage through use
- Scratches
- Stacking damage
- Loosening / detachment of seams, zippers and/or plaited strands
- Fine cracks in wood
- Turning grey / discolouration of wood
- Standard cushions

Defects that are the result of incorrect or improper use (for example: abnormal loads, damage from aggressive substances, incorrect assembly or maintenance, repairs by non-experts, etc.) are also excluded. This warranty does not entitle the purchaser to compensation. Any claims or warranty should be made through the supplier, on presentation of the sales receipt and clear pictures. For more information and practical tips on the warranty and maintenance, visit www.applebee.nl or email: service@applebee.nl.

COPYRIGHT
